

Thermal Imaging Hands-on Workshop

Fluke Thermal Imaging Hands-On Workshop is designed to provide you with practical knowledge about thermal imaging and its benefits, common applications, and troubleshooting practices.

In addition to learning about basic thermal imaging theory, you will see demonstrations of how thermal imaging has been used in actual industrial case studies, and you will have the opportunity to practice using various features of Fluke thermal imagers, including IR Fusion®.

Learn how to do more with less! This workshop will help you to troubleshoot faster and avoid downtime using the latest thermal imaging technology.

What you will learn:

- Fundamentals of thermal imaging
- How to operate the Fluke thermal imagers and capture quality images
- Understand the factors which affect the temperature readings
- How to troubleshoot using the thermal imagers in various applications:
 - Electrical
 - Mechanical / Electromechanical
 - Heating, Ventilation and Airconditioning
 - Building inspection
- How to select the right imager for your application
- How to prepare inspection report and quantify cost savings

Who Should Attend:

- Professionals who want to find out more about thermal imaging in general
- Plant electricians
- Field service technicians
- Facilities maintenance supervisors and technicians
- Process technicians
- Roofing specialists
- Building professionals

What you will receive:

- Learn and get hands-on experience on the latest thermal imaging technology
- Consultations with a Fluke expert to customize your thermal imaging solution
- Great networking session! Get to learn the best experience & tips from people of various industries.
- Exclusive Fluke Thermal Imaging training DVD costs S\$459! It teaches you from set up to thermography theory to step-by-step instructions on how to analyze images and produce professional looking reports.
- Proactive maintenance poster – see how unplanned downtime impacts your budget, resources and company's profitability and how you can prevent them
- Certification of attendance

About our speaker:

Mr. Joseph Ong, Senior Product Consultant
Fluke South East Asia Pte Ltd

Bio-data

Joseph has a degree of Master in Information Technology from University of Newcastle, and a Level 1 Infrared Thermography certificate from the Institute of Infrared Thermography.

He is currently the Senior Product Consultant in Fluke South East Asia Pte Ltd. He has more than 14 years of experience in pre-sales and post-sales application supports on electrical and electronic testing instruments. He is very experienced trainer in thermal imaging, and has been conducting regular product training and seminar both in Singapore and the regional countries.
